

Tech Lead, Software Architect for a B2B Cloud Solution (f/m/d)

Become part of a young deep tech and software startup and revolutionize material development with us. ExoMatter is a spin-off of the German Aerospace Center (DLR). Since the beginning of the year we are revolutionizing materials development.

Recently, we have managed to be part of Xpreneurs Batch 12, a program of UnternehmerTUM for the best startups in Germany, and we have a first software product on the market (<https://dashboard.exomatter.ai>).

ExoMatter offers you the chance to plan and build the next version of our SaaS materials research cloud solution from scratch and set up your own team at our Munich and Cologne sites. You will join the founding team with the potential to later become our CTO (Chief Technology Officer, f/m/d).

Your tasks

- You will plan and implement the architecture of our cloud software solution with a focus on building an amazing front end and a scalable product
- You join the founders in building our startup and its product in its seed stage and represent ExoMatter's technology towards investors and customers
- You are responsible for our product strategy and its execution
- You will hire additional team members in collaboration with the founders

Our requirements

- You are familiar with cloud implementations on a linux server, git, Javascript, and relevant frameworks to build a cloud application. Knowledge of Django and Python is a plus to understand our existing code.
- You are passionate about building a tech startup and love thinking big as a true visionary.
- You were able to gather first experience in leading development projects and ideally already led a tech team.
- You are familiar with agile project management tools.
- You have a hands-on mentality and are willing to spend a lot of your time implementing/coding your ideas in the first 1-2 years.
- You have at least 2-3 years of full-time experience in software development.
- You are fluent in English. Proficiency in German is a plus.

Why ExoMatter

- **Ownership:** We offer you a highly ambitious work environment with a steep learning curve and responsibility for your own areas and tasks.
- **Team Spirit:** We are an ambitious team with an appreciative working atmosphere; active participation and transparency are part of our lived company DNA.
- **Flexibility:** We know that it is not always easy to manage your private life and your job, so we help you to find individual solutions in terms of working hours and WFH.
- **Sustainability:** We don't engage in greenwashing but take an honest and professional look at how we can make ExoMatter a little more sustainable every day.

What we offer

- Competitive package of salary, (virtual) stock options, and benefits
- Attractive company culture in an early-stage startup
- Flexible work hours with strong focus on work-life balance far beyond industry standard
- Free choice of tech (latest MacBooks or ThinkPads), private use possible
- Full time position, part-time work possible upon agreement
- Hybrid work with flexible arrangement between on-site work in our new Munich office (location tba) and remote work

Start date: Dec 2022 – Feb 2023
