

Full Stack Developer for a B2B Cloud Solution (f/m/d)

Become part of a young deep tech and software startup and revolutionize materials development with us. ExoMatter is a spin-off of the German Aerospace Center (DLR). In early 2022 we founded our startup.

We have a first product on the market with paying customers and a strong upward trajectory. ExoMatter offers you the chance to build the next version of our SaaS materials development cloud-based platform from scratch and closely work with experienced external developers. We offer a 32-35h work week, virtual stock options, and a flexible hybrid work arrangement. Our current Tech Stack includes JavaScript in the Frontend and Java+Python in the Backend.

Your tasks

- You will build the next version of our B2B cloud solution in close collaboration with external developers in Germany and the founders, and assure the quality of the externally provided solutions.
- You join the founders in building our startup and its product in its seed stage and represent ExoMatter's technology towards investors and customers.
- You take care of Managing our cloud infrastructure and DevOps.
- You will support the founders in hiring additional team members for a successful transition from an external development team to internal resources.

Our requirements

- You are familiar with cloud implementations on a linux server, git, Javascript, and relevant frameworks to build a cloud application. Knowledge of Django and Python is a plus to understand our existing code.
- Ideally, you are proficient in Java Spring, Kubernetes and Docker, ideally also Vue.js and Typescript
- You are passionate about building a tech startup and love thinking big as a true visionary.
- You were able to gather first experience in agile IT project management
- You have a hands-on mentality and are willing to spend a lot of your time on implementation and coordination.
- You have at least 1-3 years of full-time experience in software development.
- You are fluent in English. Proficiency in German is a plus.

Why ExoMatter

- Ownership: We offer you a highly ambitious work environment with a steep learning curve and responsibility for your own areas and tasks.
- Team Spirit: We are an ambitious team with an appreciative working atmosphere; active participation and transparency are part of our lived company DNA.
- Flexibility: We know that it is not always easy to manage your private life and your job, so we help you to find individual solutions in terms of working hours and WFH.
- Sustainability: We don't engage in greenwashing but take an honest and professional look at how we can make ExoMatter a little more sustainable every day.

What we offer

- Competitive package of salary, (virtual) stock options, and benefits
- A full-time contract based on a 32-35h per week with flexible choice between a 4- and 5-day week
- Attractive company culture in an early-stage startup
- Flexible work hours with strong focus on work-life balance far beyond industry standard
- Free choice of tech (latest MacBooks or ThinkPads), private use possible
- Hybrid work with flexible arrangement between on-site work in our new Munich office (location tbd) and remote work

Start date: Mar 2023 – June 2023
